YEAR 9 STUDY SKILLS

Exam Revision Planner

A countdown plan that spreads revision across every subject

anythingpdf.com.au

Name: _____ **Date:** _____ **Score:** _____ / 4

Build your revision countdown

- Start 2–3 weeks before exams. Cramming the night before doesn't work well.
- List every subject and its topics, then rate each topic red, amber or green.
- Spend the most time on red (weak) topics.
- Mix subjects each day and finish every session with practice questions.

Choose the best answer.

1. You rate a topic 'red'. That means...
   (a) it's not on the exam (b) you don't understand it well yet (c) you've finished it
2. Which revision plan is best?
   (a) one subject per week (b) everything the night before
   (c) short sessions on several subjects every day
3. The best way to end a revision session is...
   (a) answer practice questions (b) re-read your notes (c) check your phone

Plan it.

4. Exams start in 14 days. You have 6 subjects. If you revise 2 subjects a day, how many times will you revise each subject?

Topic traffic lights.

Subject	Topics	Red / amber / green
